

COSMETIC & MICRO DENTISTRY CENTRE

WHAT IS YOUR DREAM SMILE?

Some people dream of Hollywood-style perfection. Some simply desire the confidence that comes from having an aesthetically pleasing smile. At the Cosmetic & Microdentistry Centre your dreams can be achieved with just one or two appointments.

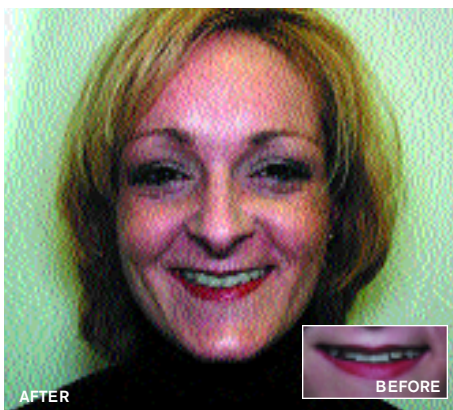

A desire to look attractive is no longer taken as a sign of vanity. Numerous social studies have shown that attractive individuals are treated better, with more consideration, and find it easier to get a desired job. A great amount of research has shown the advantages of an attractive smile.

Masters in the art of dentistry and individual smile design, the professional team at the Cosmetic & Microdentistry Centre take the time to get to know their patients – their personality, their needs, and their perception of beauty and attractiveness. Together they design a personal smile that best suits their clients.

Dr Yvonne King, the Director of the Cosmetic & Microdentistry Centre says, "a smile forms an integral part of a person's self-image. We at the Cosmetic and Microdentistry Centre have the reputation for the creation of beautiful personalised smiles."

Dr King has geared the practice around aesthetics perfection and general dentistry including the most conservative and advanced dental care. She has studied the latest in Esthetics and smile design in Australia, USA and Europe. Dr King has attained numerous qualifications and memberships, including the world-recognised American Academy of Cosmetic Dentistry.

Using the latest technology including full computerisation, lasers, air-abrasion (micro dentistry) and microscope magnification, patients are treated to the most advanced forms of treatment to improve their self-image and quality of life, all while being entertained by music or videos while in the chair.
