

IMAGINE THE NEW YOU!

AS NO TWO PEOPLE ARE THE SAME, NO TWO SMILES SHOULD BE THE SAME, ACCORDING TO DR YVONNE KING

A dream smile of an actual patient created by Dr King

Regardless of where you come from or what language you speak, your smile is one of the main ways we communicate. In a split second it instantly portrays your personality, self-image and how you feel about the people you're with.

A healthy attractive smile is an important part of our life – it impacts on our health, self-esteem and relationships, both personal and professional.

Dr Yvonne King is known for her exceptional ability to create a "dream" smile that complements the patient's appearance and personality. By combining science, art and the latest technology, Dr King provides world class dental treatment in unsurpassed comfort.

In as few as two visits Dr King can change your appearance. Discoloured, worn, crooked, gappy or chipped teeth can be custom designed into your dream smile. You don't have to be born with a beautiful smile to have one.

The Cosmetic & Laser Dentistry team of dedicated, experienced professionals takes pride in their unique approach to dentistry to ensure their patients have a caring, informative experience and always strive to exceed their patient's expectations.

Dr King has received her Fellowship and Diplomate status in minimally invasive dentistry and Laser trainers' qualification in the USA. She is a member of the prestigious American Academy of Cosmetic Dentistry and has had her work showcased by leading lecturers around the world, in newspapers and magazines.
